

# RANGER NEWS

June 2002

## ■ Woertz and Baukilit products first displayed in Asian Elenex 2002

Asian Elenex 2002 will show at the HK Convention & Exhibition Centre from 11 to 14 June where Ranger will highlight the newly emerging Swiss-made **Woertz** Flat Cable Systems and Terminal Block series.

Also first displayed is the recently introduced German-made **Baukilit Halogen-free** Cable Trunking.

See also other latest **Rittal, PMA, Jacob, Baldi, ACME** and **Lampertz** exhibits for an update.

Contact Ricky Tsang, Dickson Kiang, Billy Cheuk or Sam Chan for details. Tel +852 24208928 E-mail [sales@ranger.com.hk](mailto:sales@ranger.com.hk)

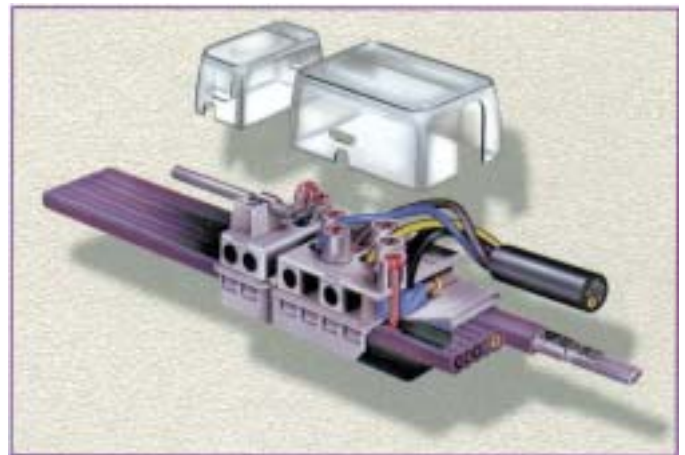

## ■ Seminar on Woertz Flat Cable Systems scheduled for July 2002

Well accepted by the local market since its first launch early this year, **Woertz's** export manager Jean-Pierre Lecury will come over in July to look more closely at the Flat Cable Systems applications, and bring us his experience from Europe.

A 3-hour seminar with free lunch is scheduled for the 2<sup>nd</sup> week in July 2002. Welcome Jean-Pierre and thanks for his valuable time dedicated to the Far East. Seats are reserved on a first-come-first-served basis; come and join us!

Contact Billy Cheuk for more details and/or seat reservations.

## ■ New generation PMA abrasion protection sleeves first available in market

**PMA** has introduced the new generation abrasion protection sleeves for conduits in the most critical situations ever. The new model has high chafing resistance and two self-cutting vibration safe installation screws as well as ribs for axial fixation. No comparable products are yet available in market.

Contact Ricky Tsang or Dickson Kiang for more details and/or samples. Tel +852 24208928 E-mail [sales@ranger.com.hk](mailto:sales@ranger.com.hk)

## ■ Lampertz – Spectro-Data® Vision

### System and DIS-DATA Safe®

won jobs at

## Hong Kong International Airport

Hong Kong Airport Authority has recently procured German tailor-manufactured Lampertz Spectro-Data® Vision system for its Airfield Ground Maintenance Building as well as numerous biggest-

sized DIS-DATA Safe® for the airport operations. To show great interest and concern over HK projects, Lampertz's Asia Pacific agent Karl-Heinz Hummitzch made his special visit in March this year to the airport site and some other job locations with fruitful returns. He believes Ranger poses as a good example of securing many highly prestigious clients here with the superb German design. Contact Sam Chan for details and/or design proposals.

# New Product Brief

## Woertz Flat Cable Systems

Newly joined Sales and Service Engineer Billy Cheuk has seen increasingly high opportunities for the **Woertz Flat Cable Systems** locally, due to flexibility and modularity. Customers are often looking for quick and readily connectable power installation that can save both time and effort in planning, system maintenance and ad hoc extensions.

Woertz has characterized the flat cable systems for building

Ecobus Power  
5 x 10 mm<sup>2</sup>

Ecobus Power  
5 x 2.5mm<sup>2</sup>

Ecobus Combi  
5x2.5mm<sup>2</sup> + 2x1.5mm<sup>2</sup>

Ecobus Data  
2 x 1.5mm<sup>2</sup>

Ecofil i  
5 x 16mm<sup>2</sup>

Ecofil i  
7 x 2.5 mm<sup>2</sup>

automation by introducing the bus part, the data section which receives control commands compatible with EIB, LON, Twiline, Luxmate and Batibus technologies.

Available system models are shown below.

Contact Billy Cheuk for free demonstration and design.
