

All electrical installations must comply with the relevant laws in force, namely that the systems must be properly installed, that can be achieved by using well-done equipments and accessories.

APPROVALS AND CERTIFICATES

ELETTROCANALI has always pursued the global quality of the product and process, in the design, manufacturing and marketing of properly manufactured products, as demonstrated by the Quality System Certification in accordance with standard ISO9001/2008 and the quality approvals given by the most important world certification bodies.

ELETTROCANALI is a member of ANIE National Association of Electrotechnical and Electronics Industries

ASSOCIATO

FEDERAZIONE NAZIONALE
IMPRESE ELETTROTECNICHE
ED ELETTRONICHE

Quality certificate according to the Standard ISO 9001-2008 for the production facilities in Scanzorosciate and Pedrengo.

"CE" MARKING

ELETTROCANALI confirms that all the products comply with the essential requirements of the Low Voltage Directive 2006/95/CE and they have CE mark.

RoHS REGULATION

ELETTROCANALI has always paid attention to the respect for the environment and to the customers' needs and supplies products complying with the requirements of the European regulation RoHS, which obliges manufacturers and distributors of electrical and electronic equipments put into the European market to limit the use of hazardous substances. The Regulation requires that starting from 1st July 2006 all equipments do not contain heavy metals and their compounds such as:-Lead (Pb) - Mercury (Hg) - Cadmium (Cd) - Hexavalent chromium (Cr +6) and some halogenated substances used as flame retardants in plastic raw materials, such as polybrominated-(PDB)-polybrominated diphenyl ethers (PBDEs). Our suppliers' certifications, combined with our controls both of the materials and of the processes ensure the compliance with the Regulation.

WARRANTY

The warranty we grant for all our products has a duration of 24 months from the date of the invoices and it is understood that during this period we undertake to repair or replace those products or equipment that turns out to be defective and therefore not good for the purposed they are meant to. We reserve the right to decide whether to repair or replace the pieces/equipments. We exclude, however, to send our somebody of our staff to check the electrical systems in which our products are installed, except for the cases where, we think it absolutely necessary to control the operating conditions under which our products have been subjected.

Our warranty is valid only if the products/devices have been properly installed, have not been tampered or modified and all the technical indications and specification indicated in our catalogues and instruction sheets have been strictly observed. The warranty doesn't cover the all parts subject to premature wear as well as natural consupcion.

The Customer shall give written notice of the faults and defects reported with regard to their exact nature and we will see to the rapair or the replacement according to what said above.

The material to be repaired or replaced must be returned to us free of charge., With the repair or replacement of equipments/parts proved to be defective our company will be exonerated from any responsibility, while the Customer renounces to any claim for damages and expenses. In certain cases we allow the Customer to carry out the repair or the replacement, provided that Elettrocantali will pay only the costs recognized as necessary for make our products/equipments to work. We won't recognize any expense that the buyer bear, even during the warranty period, without our prior written permission. In the manufacture of its equipment our Company reserves the right to use any material that it is considered as the most appropriate, to make changes in the shape, weight or size of its products.

PACKAGING

The packaging of ELETTRICANALI products has been designed and made with particular care in order to gain the following objectives:

- Protection of the packed products.
- Optimisation of the shapes and the volumes of the packages so that they can be easily put on pallets or loaded into different containers.
- Rational and modular storage to make the product handling both in wholesale and retail easier.
- Clear and univocal identification of the product thanks to well dimensioned easy-to-read labels with bar code.
- Low environmental impact obtained by packaging complying with the requirements of the actually regulations on recycling.

ELETTRICANALI packing type

Protective packaging for minipallets of rigid conduits

Protective packaging for pallets of pliable conduits

TRANSPORT AND LOGISTICS

The strategical location of the production facilities, together with the availability of wide surfaces destined to storage, has undoubtedly favoured the fast expansion and consolidated the good opinion on ELETTRICANALI brand.

Our customer can always rely on the immediate product availability and a quick delivery, where the "just in time" has become a must in order to be competitive.

ELETTRICANALI grants the customers an accurate delivery service, guaranteed by its fleet of commercial vehicles and by a network of partner-forwarders, capable of fulfilling any transport need.

TABLE CONCERNING THE RESISTANCE TO ATMOSPHERIC/CHEMICAL AGENTS

	UV-Rays	Mineral Oil	Saline	Acids		Bases		Solvents

IP PROTECTION DEGREE – Reference Standard EN 60529

The enclosure protection degree against the ingress of solid objects and water is indicated by IP (Ingress Protection) followed by two digits; graphic symbols can be added, too.

FIRST DIGIT

The first digit indicates the protection level against the ingress of solid bodies or dust the protection of any person touching hazardous parts and human been contact with live components..

IP0X Not protected.

IP1X Protected against solid objects
diam. > 50 mm.

IP2X Protected against solid objects
diam. > 12,5 mm

IP3X Protected against solid objects
diam. > 2,5 mm

IP4X Protected against solid objects
diam. > 1 mm

IP5X Protected against dust.

IP6X Totally protected against dust.

SECOND DIGIT

The second digit indicates the protection level against the ingress of liquids (water).

IPX0 Not protected.

IPX1 Protected against vertical water drop.

IPX2 Protected against vertical water drop
with max inclination of 15°.

IPX3 Protected against sprayed water.

IPX4 Protected against splashed water.

IPX5 Protected against water jets.

IPX6 Protected against strong water jets.

IPX7 Protected against temporary water immersion.

IPX8 Protected against constant water immersion.

THIRD ADDITIONAL LETTER (OPTIONAL)

A Protected against access to hazardous
parts with the back of a hand.

B Protected against access to hazardous
parts with a finger.

C Protected against access to hazardous
parts with a tool.

D Protected against access to hazardous
parts with a wire.

FOURTH ADDITIONAL LETTER (OPTIONAL)

H High tension apparatus.

M Test with water while apparatus is running.

S Test with water while apparatus is stationary.

W Wheather conditions.

Resistance to abnormal heat - Standard IEC 695-2-1

Glow Wire Test.

It verifies that abnormal heat caused by overcurrents don't compromise the resistance of the insulating material.

Heat source	Result	Test lasting and execution	Peculiar elements	Test temperature	Test temperature	Test temperature	Test temperature
4 mm diameter incandescent wire	Possible flame must extinguish within 30 seconds after the incandescent is removed	The incandescent wire must touch the product for 30", it can penetrate but not set on fire or generate incandescent drops	Time for flame extinguishing	650 °C Applicable on non-tension parts	750 °C Applicable on under tension parts of plugs and mobile sockets	850 °C Applicable on under tension parts of fix plugs and switches	960 °C Applicable on under tension parts of fix plugs and switches

Self-extinguishing degree - UL94 Standard

UL Test.

Specimen burning time measurement upon heat source removal.

Heat source	Result	Test lasting and execution	Peculiar elements	Test result	Test result	Test result	Test result
Bunsen burner flame	Flame extinguishing time and burning speed	Flame applied for 10 seconds and for two consequent times	Burning lasting	V0: specimen burning less than 5 seconds before self-extinguishing	V1: specimen burning less than 25 seconds before self-extinguishing	V2: specimen burning less 25 seconds before self-extinguishing with incandescent drops	HB: specimen burning more than 25 seconds (horizontal position and burning speed less than 38 mm/minute)

IK Protection degree against mechanical impact - EN 50102 Standard

Protection degree against mechanical impact.

Measurement of impact Energy.

IK Code	00	01	02	03	04	05	06	07	08	09	10
Impact energy	Not protected	0,15 Joule	0,2 Joule	0,35 Joule	0,5 Joule	0,7 Joule	1 Joule	2 Joule	5 Joule	10 Joule	20 Joule
