

獲得多項國際質量認證

SWISS WOERTZ TERMINALS AND ACCESSORIES

瑞士 WOERTZ 衛士牌接線端子具有如下優異特性，以保證電氣安裝系統的效能和安全性。

A) 壓緊的螺釘為不銹鋼以抵受高拉力，防止螺牙受損。
Clamping screw to be made of stainless steel subject to high torque and which is not easy to have threads worn.

B) 鉗座以一體化設計，螺孔較深，可更好地防止滑牙情況發生。
Clamping unit to be of one-piece design which enables rigid and thicker material for threaded hole.

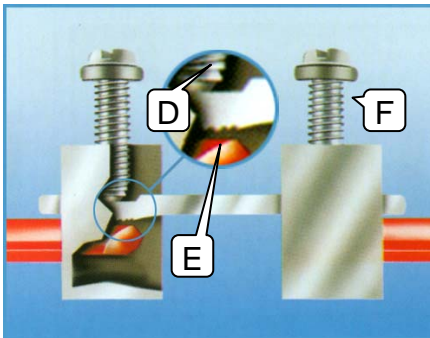

C) 鉗座的底部 [V] 型坑設計，以便增加接觸面防滑動。
Bottom of the clamping unit to be of V-groove to firmly attach the crimped wire.

D) 鉗座的連接條兩端有垂直的坑紋，壓緊電纜。
Ridges at the bottom of two ends of the connecting bar to be vertical and strong to tightly fix the crimped wire.

E) 鉗座的連接條以鍍鎳黃銅或純銅製成，以提高傳導性和防腐蝕性。
Connecting bar to be made of nickel-plated brass/copper alloy of high conductivity and corrosion resistance.

F) 鉗座以整塊黃銅壓制而成，外鍍鎳，可提高傳導性和防腐蝕性。
Clamping unit to be made of nickel-plated brass of high conductivity and corrosion resistance.

G) 接線端子本身以聚酰胺 6.6 製成，以維持高彈性及**不含鹵素**，**無毒**。
Body material to be made of polyamide 6.6 with good elasticity and **halogen-free**.

* 另有帶彈簧片的型號產品可供選擇，可有效消除溫度和外界震動引起的鬆脫現象。

通過 ISO 9001 質量體系認證
